### Reimbursement Policy

**Subject: Transportation Services: Ambulance and Nonemergent Transport**

| Effective Date: 02/01/15 | Committee Approval Obtained: 07/13/18 | Section: Transportation |

| Policy | Anthem allows reimbursement for transport to and from covered services or other services mandated by contract unless provider, state, federal or CMS contracts and/or requirements indicate otherwise. Reimbursement is based on the guidelines in this policy. |

Due to the complex nature of transportation services, we recommend that providers also review state guidelines for coverage requirements.

---

Anthem Blue Cross and Blue Shield is the trade name of Anthem Insurance Companies, Inc., independent licensee of the Blue Cross and Blue Shield Association. ANTHEM is a registered trademark of Anthem Insurance Companies, Inc.

Providers who are contracted with Anthem Blue Cross and Blue Shield to serve Hoosier Healthwise, Healthy Indiana Plan and Hoosier Care Connect through an accountable care organization (ACO), participating medical group (PMG) or Independent Physician Association (IPA) are to follow guidelines and practices of the group. This includes but is not limited to authorization, covered benefits and services, and claims submittal. If you have questions, please contact your group administrator or your Anthem network representative.

AIN-RP-0110-18 December 2018
Nonemergent Transport Services
Nonemergency medical transport (NEMT) entails the transport of a member by nonmedically skilled personnel (laypersons) to receive covered services. There are several types of medical transports: ambulette/medi-van, wheelchair van, invalid coach, taxicab, minibus and public transportation (for example, bus and/or subway).

Reimbursement for medical transport services is based on receipt of a claim or an invoice from contracted transportation vendors or other suppliers detailing:
- The nonemergency medical transport base rate per trip where a trip is defined by the origin and destination modifiers.
- Mileage.
- Parking and/or toll fees.

Ambulance Services
Reimbursement for ambulance services is based on:
- The ambulance base rate per trip is in accordance with the medically necessary level of care provided to the member where a trip is defined by the origin and destination modifiers.
- The fee schedule or contracted/negotiated rate for services and items separately reimbursable from the ambulance base rate.

If ambulance transport is medically necessary for inpatient-to-inpatient transfer between hospital-based facilities, reimbursement is included in the inpatient stay.

Included in the Ambulance Base Rate
Services reimbursed as part of the ambulance base rate:
- Ambulance equipment and supplies:
  - Disposable/first aid supplies
  - Reusable devices/equipment
  - Intravenous drugs
- Ambulance personnel services

Separately Reimbursable from the Ambulance Base Rate
Services that are not part of the ambulance base rate are separately reimbursable expenses:
- Mileage
- Additional appropriately licensed medical personnel as medically necessary for member’s health status
- Unusual waiting time
- Disposable/first aid supplies in greater than normal use
- Oxygen

Transportation Modifiers
Claims for transportation services must be billed with the following origin and destination modifiers. Claims for transportation services submitted without origin and destination modifiers will be denied.

- **Modifier D:** diagnostic or therapeutic site/free-standing facility other than P or H
- **Modifier E:** residential, domiciliary, custodial facility (for example, nursing home, not a skilled nursing facility)
- **Modifier G:** hospital-based dialysis facility (hospital or hospital-associated)
- **Modifier H:** hospital (inpatient or outpatient)
- **Modifier I:** site of transfer (for example, airport or helicopter pad) between types of ambulance
- **Modifier J:** nonhospital-based dialysis
- **Modifier N:** skilled nursing facility including swing bed
- **Modifier P:** physician’s office including HMO nonhospital facility, clinic, etc.
- **Modifier R:** private residence
- **Modifier S:** scene of accident or acute event
- **Modifier X:** intermediate stop at the physician’s office en route to hospital (includes HMO nonhospital facility, clinic, etc.)
  - Modifier X can only be used as a destination code in the second position of a modifier.

In addition to the origin and destination modifiers, the following modifiers are to be used when appropriate:

- **Modifier GM:** indicates multiple members on one trip
- **Modifier QL:** indicates the member died after the ambulance was called
- **Modifier QM:** indicates the provider arranged for the transportation services
- **Modifier QN:** indicates the provider furnished the transportation services
- **Modifier TK:** indicates multiple carry trips
- **Modifier TQ:** indicates life support transport by a volunteer ambulance provider

**Modifiers for transportation of portable/mobile radiology equipment**

**Nonreimbursable**

Anthem does not allow reimbursement of the following for any ambulance or medical transport service provided:

- A member who is not available (no-show)
- Additional rates for night, weekend and/or holiday calls
- Mileage in transit to pick up or drop off the member (unloaded mileage)
- Mileage for additional passengers
- Mileage for extra attendant for additional passengers
- Mileage when the transport service has been denied or is not covered
- Transport for a member or caregiver’s convenience
- Transport available free of charge
- For ambulance services **only:**
  - For reasons other than medical care
  - Where another means of transportation could be used without endangering the member’s health
  - For separate reimbursement for services/items included in the base ambulance rate
  - For a higher level of care when a lower level is more appropriate
  - For both basic and advanced life support when ALS services are provided
  - For services provided by the emergency medical technician in addition to ALS or BLS base rates
  - For services provided on the ambulance by hospital staff
  - Additional ground and/or air ambulance providers that respond but do not transport the member
  - Transport from the member’s home to a facility other than a hospital, skilled nursing facility, dialysis facility or nursing home
  - Transport from a facility other than a hospital, skilled nursing facility, dialysis facility or nursing home to the member’s home
  - Transport of persons other than the member and a medically required attendant who do not require medical attention
  - Transport for a member pronounced dead prior to the ground and/or air ambulance being contacted
  - Mileage beyond the nearest appropriate facility (excessive mileage)
- For medical transport services only:
  - Transportation vendor/supplier lodging or meals
  - Vehicle maintenance or gas

### Definitions

**Ambulance services**
Ambulance services entail the medically necessary transport of a member by medically skilled personnel to the nearest appropriate facility equipped to provide care for the member’s injury and/or illness. Services are initially delineated as BLS or ALS levels of care and then further delineated as emergency or nonemergency:
- BLS consists of noninvasive services provided by personnel trained as emergency medical technicians (EMTs) (basic) in conjunction with applicable state laws.
- ALS consists of invasive services provided by personnel trained as EMTs (intermediate or paramedic) in conjunction with applicable state laws.
- Emergency ambulance transportation is an urgent service in which the member experiences a sudden, unexpected onset of acute illness or injury requiring immediate medical or surgical care, which the member secures immediately after the onset (or as soon thereafter as practical), and if not immediately treated could result in death or permanent impairment to the member’s health.
- Nonemergency ambulance transportation is a scheduled or unscheduled service in which the member requires attention by EMT-trained personnel while in transit.

### Ambulance types
- There are two types of ambulance transports:
  - Ground ambulance — an equipped and staffed land or water vehicle designed to transport a member in the supine position
  - Air ambulance — an equipped and staffed aircraft necessary to rapidly transport a member to the nearest appropriate facility that could not otherwise be accomplished or be accessed by a ground ambulance without endangering the member’s health; air ambulances are either rotary-wing (helicopter) or fixed-wing (commercial or private aircraft)

### Medical transport services
Medical transport services, also referred to as nonemergency medical transport, entail the transport of a member by nonmedically skilled personnel (laypersons) to receive covered services. There are several types of medical transports: ambulette/medi-van, wheelchair van, invalid coach, taxicab, minibus and public transportation (for example, bus and/or subway).

### Transportation modifiers
Transportation modifiers are single alpha characters with distinct definitions that are paired together to form a two-character modifier; the first character indicates the origination of the member, and the second character indicates the destination of the member
