Anthem Blue Cross and Blue Shield Healthcare Solutions is the trade name of Community Care Health Plan of Nevada, Inc., an independent licensee of the Blue Cross and Blue Shield Association. ANTHEM is a registered trademark of Anthem Insurance Companies, Inc.
ANVPEC-0377-17 December 2017

Section 1 - Basic Instructions

1.1 X12 and HIPAA Compliance Checking, and Business Edits

EDI interchanges submitted to Anthem Blue Cross and Blue Shield Healthcare Solutions (Anthem) for processing pass through compliance edits. 5010 acknowledgments and reports for accepted/rejected files will be placed in the submitter's trading partner mailbox for pickup.

- TA1 Interchange Acknowledgment. Anthem returns TA1 X12 and proprietary reports to the submitter of inbound 837 files containing envelope errors in the ISA and GS segments.
- Level 1. Anthem returns a 999 Interchange Acknowledgment to the submitter for every inbound 837 transaction received. Each transaction passes through edits to ensure that it is X12 compliant. If the X12 syntax or any other aspect of the 837 is not X12 compliant, the 999 will also report the Level 1 errors in AK segments and indicate that the entire transaction set has been rejected.
- Level 2. In addition to HIPAA TR3 edits, Anthem applies business edits to ensure that the necessary information is populated and complete for efficient processing. When encountering HIPAA compliance (including balancing), code set or business errors, Anthem returns: 1) 277 Claims Acknowledgment (CA) and 2) 864 Level 2 Status Report to the submitter identifying which claim(s) have failed.

1.2 HIPAA Compliant Codes

Use HIPAA-compliant codes from current versions of the following:

- Physician's Current Procedure Terminology (CPT)
- Health Care Financing Administration Common Procedural Coding System (HCPCS)
- International Classification of Diseases Clinical Mod (ICD-10-CM) Clinical Modification
- International Classification of Diseases Clinical Mod (ICD-10-PCS) Procedure Coding System
- National Uniform Billing Committee (NUBC) Codes
- Diagnosis Related Group Number (DRG)
- Provider Taxonomy Codes
- National Drug Codes

1.3 Diagnosis Codes

According to the 837I TR3, a transaction is not X12 compliant if decimal points are used in diagnosis codes. Therefore, should a diagnosis code contain a decimal point, Anthem will return a 999 to the submitter indicating that the transaction has been rejected.

1.4 Procedure Codes and Modifiers

All valid CPT and HCPCS codes and modifiers are accepted for claim adjudication. Refer to your billing guidelines or provider contract for submission of these codes. If submitted codes are invalid, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.5 Uppercase Letters, Special Characters, and Delimiters

As specified in the TR3, the basic character set includes uppercase letters, digits, space, and other special characters.

- All alpha characters must be submitted in UPPERCASE letters only.
- Suggested delimiters for the transaction are assigned as part of the trading partner set up. EDI Representative will discuss options with trading partners, if applicable:
 - Data Element Separator, Asterisk (*)
 - Repetition Separator (ISA11), Caret (^)
 - Sub-Element Separator, Colon (:)
 - Segment Terminator, Tilde (~)
- To avoid syntax errors, hyphens, parentheses and spaces are not recommended to be used in values for identifiers.

Examples: Recommended: Zip Code 123456789 Medical Record #
1234567

- Since originally submitted values may be returned on outbound transactions, Anthem encourages trading partners to not use the following special characters as part of the value: asterisk (*), less than/greater than signs (<, >), colon (:), and slash (/). This minimizes the risk for a special character to be recognized as a delimiter.

Example: Provider assigns a Patient Control Number '12*3456789'. Although an asterisk (*) is a valid special character, it adversely affects processing since it is also a common delimiter. The value '12*3456789' may process incorrectly as two separate values '12' and '3456789'.

1.6 Decimal "R" Data Element Types

"R" data element types contain a decimal point; involving monetary amounts, units, visits, weights, and frequency. Anthem recommends using decimal points for monetary amounts, and whole numbers for other types of "R" data elements. Except for monetary amounts, if "R" data element type includes a decimal and numbers after the decimal, Anthem adjudicates the claim based on the whole number. Numbers after the decimal will not be considered.

1.7 Numeric Values, Monetary Amounts and Units

- Anthem pays all claims in US dollars and therefore, accepts monetary amounts in US dollars only. If codes related to foreign currencies are used, then a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.
- Anthem recognizes units in whole numbers only.
- Anthem recognizes units in values of less than 9999 and greater than or equal to zero.
- If a negative service line charge or negative units are used, then a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

SV203 Monetary Amount - Line Item Charge Amount
SV205 Quantity - Service Unit Count

1.8 Address Information

- P.O. mailboxes / Lock Boxes are not allowed in the Billing Provider loop. If submitted in the Billing Provider loop, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.
- The Pay-to Address loop does support P.O. Box / Lock Box addresses. Therefore, if payment is expected to be remitted to a P.O. Box / Lock Box, submit the P.O. Box / Lock Box address.
- Full 9-digit zip codes are required in the Billing Provider and Service Facility Location loops. If 5-digit zip codes are used in these loops, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.9 Coordination of Benefits

Specific 837 data elements work together to coordinate benefits between Anthem and Medicare or other carriers. Following the Provider-to-Payer-to-Provider model;

- The provider sends the 837 to the primary payer.
- The primary payer adjudicates the claim and sends an 835 Payment Advice to the provider. The 835 includes the claim adjustment reason code and/or remark code for the claim.
- Upon receipt of the 835, the provider sends a second 837 with COB information populated in Loops 2320, 2330A-I, and/or 2430 to the secondary payer. The secondary payer adjudicates the claim and sends an 835 Payment Advice to the provider.

Anthem recognizes submission of an 837 transaction to a sequential payer populated with data from the previous payer's 835. Based on the information provided and the level of policy, the claim will be adjudicated without the paper copy of the Explanation of Benefits from Medicare or the primary carrier.

When more than one payer is involved on a claim, data elements for all prior payers must be present (i.e., if a tertiary payer is involved, then all the data elements from the primary and secondary payers must also be present).

If data elements from previous payer(s) are omitted, Anthem will fail the particular claim.

1.10 Claims and COB Balancing

For COB claims, balancing is performed at both claim and service line on the payment charges for each payer. If not balanced, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

- Loop 2300 CLM02 (Total Claim Charge) must equal the sum of Loop 2400 SV102 (Line Item Charge).
- Loop 2320 AMT02 (COB Payer Paid Amount) must equal the sum of Loop 2430 SVD02 (Line Adjudication Information) less the sum of Loop 2300 CAS (Claim Level Adjustments).
- Loop 2400 SV102 (Line Item Charge Amount) must equal the sum of Loop 2430 SVD02 (Line Adjudication Information) plus the sum of Loop 2430 CAS (Claim Level Adjustments).

1.11 Taxonomy Codes (PRV)

The Healthcare Provider Taxonomy code set divides health care providers into hierarchical groupings by type, classification, and specialization, and assigns a code to each grouping. The Taxonomy consists of two parts: individuals (e.g., physicians) and non-individuals (e.g., ambulatory health care facilities). All codes are 10-alphanumeric positions in length. Health care providers select the taxonomy code(s) that most closely represents their education, license, or certification. If a health care provider has more than one taxonomy code associated with it, a health plan may prefer that the health care provider use one over another when submitting claims for certain services.

It is strongly recommended that the taxonomy be populated in PRV segments for all applicable claims that you are filing. Refer to the CMS website for a listing of codes, www.wpc-edi.com/taxonomy.

Section 2 - Enveloping

EDI envelopes control and track communications between you and Anthem. One envelope may contain many transaction sets grouped into the following:

- Interchange Control Header (ISA)
- Functional Group Header (GS)
- Functional Group Trailer (GE)
- Interchange Control Trailer (IEA)

837 Institutional Health Care Claim–Envelope Specific to Anthem (TR3, Appendix C)							
ISA—Interchange Control Header		GS—Functional Group Header		GE—Functional Group Trailer		IEA—Interchange Control Trailer	
ISA01	00	GS01	HC	GE01	refer to TR3	IEA01	refer to TR3
ISA02	refer to TR3	GS02	SENDER ID	GE02	refer to TR3	IEA02	refer to TR3

ISA04	refer to TR3	Left-justified followed by no zeroes or spaces					
ISA05	ZZ	GS03	ANTHEMNV				
ISA06	SENDER ID	GS04	refer to TR3				
EDI assigned Left-justified followed by spaces		GS05	refer to TR3				
ISA07	ZZ	GS06	refer to TR3				
ISA08	ANTHEM	GS07	X				
ISA09	refer to TR3	GS08	005010X223A2				
ISA10	refer to TR3						
ISA11	^ (5E)						
ISA12	00501						
ISA13	refer to TR3						
ISA14	refer to TR3						
ISA15	refer to TR3						
ISA16	refer to TR3						

NOTE. Critical Batching and Editing Information
 *Transactions must be batched in separate functional group by GS03.
 *Unique group control number (GS06) MUST NOT be duplicated within 365 days by Trading Partner ID (GS02); files containing duplicate or previously received group control numbers will be rejected.

Section 3 - Charts for Situational Rules

Listed below are loops, segments, and data elements required for proper adjudication by Anthem per the situational rules in the 837I TR3.

837 Institutional Health Care Claim					
TR3	Segment	Reference Designator(s)	Value	Definitions and Notes Specific to Anthem	
P.67	ST Transaction Set Header	ST03 Implementation Convention Ref	005010X223A2	005010X223A2 - Health Care Claim, Institutional	
P.68	BHT Beginning of Hierarchical Trx	BHT06 Transaction Type Code	CH	CH - Chargeable	
			31	required for Medicaid Reclamation	
Loop ID 1000A—Submitter Name					
P.71	NM1 Submitter Name	NM109 Identification Code	(Submitter Identifier) UPPERCASE	<ul style="list-style-type: none"> ▪ EDI assigned Sender ID. ▪ Equals the value entered in ISA06 and GS02.
